

Dear Sir or Madam:

I am a representative of the EagleBots 22032 Robotics Booster Team. This is our third year collaborating with local leaders in the field of science and engineering to continue our FIRST Tech Challenge (FTC) program. We are currently searching for local sponsors to support us in funding for parts and equipment.

FIRST (www.firstinspires.org) stands for “**F**or **I**nspiration and **R**ecognition of **S**cience and **T**echnology,” and was the brainchild of Dean Kamen, inventor of the Segway. Founded in 1989 with the purpose of giving students the opportunity to gain hands-on experience with skills such as computer programming, electrical engineering, and structural engineering, FIRST creates an exciting environment for students like us to pursue STEM experiences.

Our goal for this season is to compete in three local events (one scrimmage and two area qualifiers) and to place at one of these in order to go to the Louisiana Regional Competition.

We are currently fundraising for our 2024-2025 season “Into the Deep”. Our goal is to raise \$8,000 to be spent on technology for the team such as new robotics parts and controller, a color printer, 3D filament for CAD created items, spirit items, tools, and other equipment.

All donors will receive a certificate of donation and non-profit information. Attached you will find a copy of our *EagleBots 22032 Robotics Booster Team Sponsorship Form*. If you choose to support us, please add the necessary information to this sponsor sheet and return via email (eaglebots22032@gmail.com) or by mail. Checks should be made payable to the *EagleBots 22032 Booster Club*. If you choose to do an in-kind donation for tools or equipment, please include a receipt and place of purchase.

Thank you so much for your consideration. If you have any questions about the Robotics and Booster Team, please do not hesitate to contact us.

Best Regards,

Charla Rhoderick
